

How does it work for Customers?

Credit Calculations

P-Metric Sizes

$$\text{Credit} = \frac{70,000 - \text{kilometres travelled}}{70,000} \times \text{Price}$$

LT-Metric sizes

$$\text{Credit} = \frac{60,000 - \text{kilometres travelled}}{60,000} \times \text{Price}$$

In the rare case your Dynapro RF12 does not last 70,000km for P-Metric sizes, or 60,000km for LT-Metric sizes, a pro-rata credit will be provided using the formula above.

This means, if your Dynapro RF12 delivers 63,000km on P-Metric size, you will receive a discount of 10% (7,000/70,000=10%) on your replacement tyres. If a set of 4 replacement tyres cost \$1,000, we will provide a credit of \$100 towards it.
